SUMMARY OF QUALIFICATIONS

- 3+ years of programming experience in Python, JavaScript, and Java building full-stack web applications and AI-powered systems
- Proficient in React, Node.js, Express, and PostgreSQL/MongoDB with deployed production applications
- Strong foundation in CS fundamentals and development with experience in collaborative environments

EDUCATION

University of Toronto

Toronto, ON

Bachelor of Science in Computer Science (Specialist), Minor in Mathematics

Expected Graduation: May 2027

- **Relevant Coursework:** Operating Systems, Software Engineering, Databases, Data Structures, OOP

EXPERIENCE

Radical AI

May 2024 – Aug 2024

Software Engineer Intern

New York City, NY

- Designed and optimized **5+ ML models** with monitoring system tracking performance across **10+ test scenarios**
- Developed **15+ AI-powered backend features** using Node.js/Express and Python, improving response time by **50%**
- Collaborated in Agile team of **8+ members**, participating in **20+ sprint planning sessions**

DataAnnotation

May 2025 – Aug 2025

Software Engineer (Freelance)

Remote

- Completed **30+ code review and debugging tasks** across Ruby, C, and JSON, improving model accuracy by **15%**
- Evaluated **100+ AI-generated responses**, providing feedback on syntax, logic errors, and best practices
- Debugged **50+ code snippets**, identifying **20+ error patterns** for model training improvement

PROJECTS

Nirvo - Workplace Wellness Platform | *TypeScript, React, Next.js, Python, Vercel, OpenAI API*

- Built **3+ AI-powered features** in **7-person Agile team**, including smart recommendations using OpenAI API
- Redesigned landing page, reducing load time by **30%** and adding **5+ interactive components**
- Resolved **15+ critical bugs** including email verification and filtering issues, improving stability by **40%**

UofT Campus Connect | *React, Node.js, Express, Prisma, PostgreSQL, Railway*

- Built full-stack app with React and Node.js/Express backend, supporting **100+ concurrent users**
- Implemented JWT authentication and built **10+ RESTful API endpoints** for **CRUD** operations
- Deployed to Railway achieving **99% uptime** and resolved **5+ production errors**

SecureNet Analyzer | *Kali Linux, Nmap, Wireshark, Bash, Python, SSH*

- Scanned **15,000+ ports** using nmap, identifying **20+ running services** and vulnerabilities
- Analyzed traffic with Wireshark, detecting **50+ suspicious packets** across **10+ scenarios**
- Exploited **5+ insecure services** and documented mitigation strategies

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, HTML, CSS, SQL (PostgreSQL & MySQL), C, Ruby, Bash

Frameworks: React, Node.js, Next.js, Express.js, Django, Tailwind CSS, Prisma ORM, Bootstrap

Developer Tools: VS Code, Git, Docker, Postman, SSH, Railway, Vercel, Chrome DevTools, Linux Terminal
